Subject: Smart Intelligent Village (Satnavari) in Nagpur Rural District

Ref: In refrance to your mail dated 31/07/25

Dear Sir,

This is with refrance to your communication that a Telecom industry society of domestic design led players supporting Make in India and Atma Nirbhar Bharat, had shared a paper on "Smart Intelligent Village" with the Government of Maharashtra. A meeting with Cabinet Secretary, to CM on 11th June 2025 and to the Maharashtra Chief Minister on 19th June 2025 resulted in a suggestion of a pilot project in rural village of Maharashtra. Use cases proposed were on E-health, e-education, smart agriculture, smart irrigation, drone-controlled fertilizer and pesticide spray, fisheries, bank on wheel, smart surveillance and many more that can transform the lives of rural Maharashtrians through digital connectivity.

As the domestic consortium under VoICE had offered to showcase the implementation of the Smart Intelligent Village Pilot Project by bringing in their own equipment with no cost to the Government, on equipment deployment, we have identified village SATNAVARI in Nagpur Rural District to be taken up and we will prefer the pilot project which may the first one of its kind in India to be ready by 15th August 2025. Bharatnet OFC bandwidth and other technology options as relevant can be tapped for the use cases. Administrative, infrastructure as may be required will be provided from our side.

VoICE team permitted for the pilot project with no future commitment will include Indio Networks, Invas Technologies, Mashmari, Sparsh, Sensorise, Superceuticals, VamBX (Finaara), Innogle, UTL, Matrecomm, Insta ICT Solutions, Idasu Labs, Photonix, Lekha Wireless, Niral Networks, Optimus Logic, Core Data Networks, Pragmata, Resonous, CDOT, Menthosa, Signalchip and Mangalcare.

We look forward to continued cooperation for the successful implementation of the smartintelligent village initiative at Satnavari.

Best Regards,

(Vinayak Mahamuni IAS)
Chief Executive Officer
